IMPORTANT ASTM-2200 REVISIONS

As of March 15, 2011 ASTM clarified the requirement of a separate pedestrian gate. According to the new revisions, the gate should be installed in a location that does not come in contact with a moving vehicle access gate and a pedestrian gate shall not be incorporated into an automated vehicular panel.

Also, the 2 and 1/4 inch guarding/screening requirement in section 6 has been changed from 48 inches to 72 inches. All openings shall be designed, guarded or screened from the bottom of the gate to a minimum of 72" above grade.
